

Assignment: Asynchronous Programming Exercises

Objective:

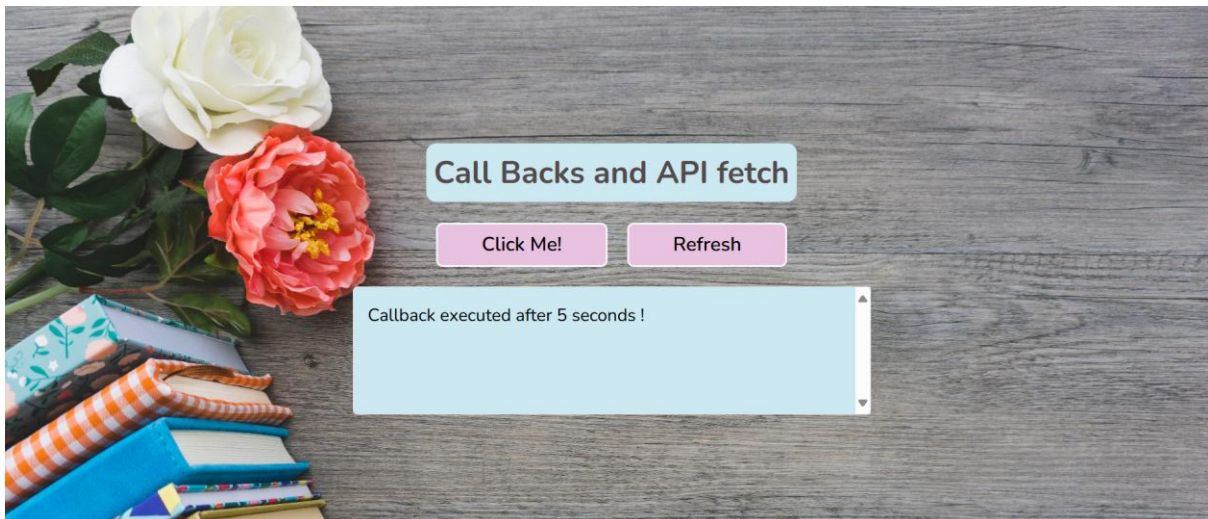

Develop a series of JavaScript exercises focusing on different asynchronous programming techniques such as callbacks, promises, and async/await, while integrating API calls to display data.

My work:

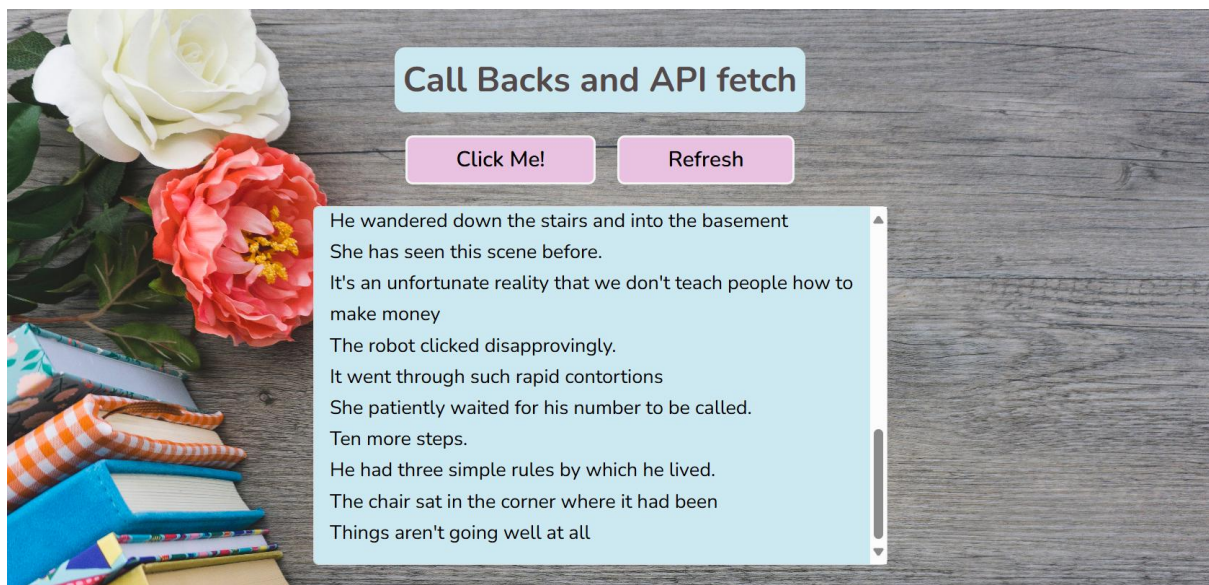

- I include CSS and JS file in HTML for 3 assignment
- I gave background image to all the 3 task
- I was not focus on responsive
- I gave better style and functionality to each task
- I done my each given task under the guidenence

Screenshot:

Task1: Callbacks

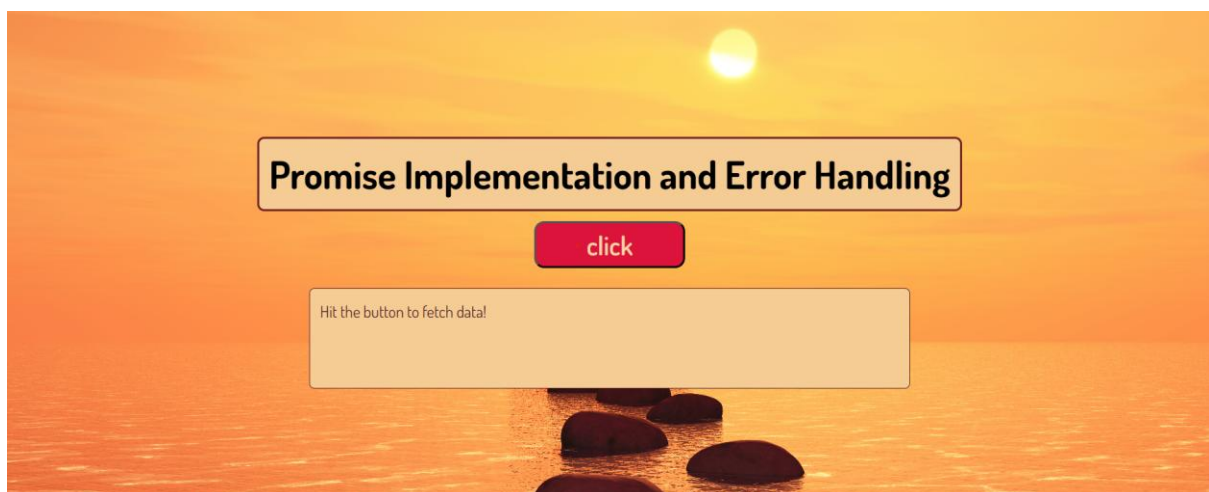

When you click the button

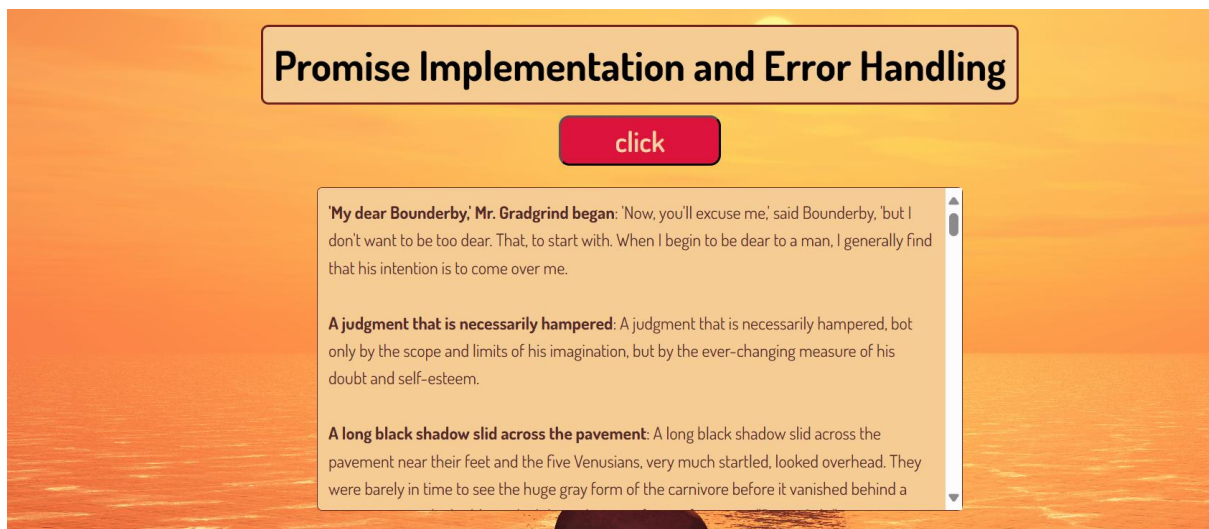

You refresh the content using “Refresh Button”

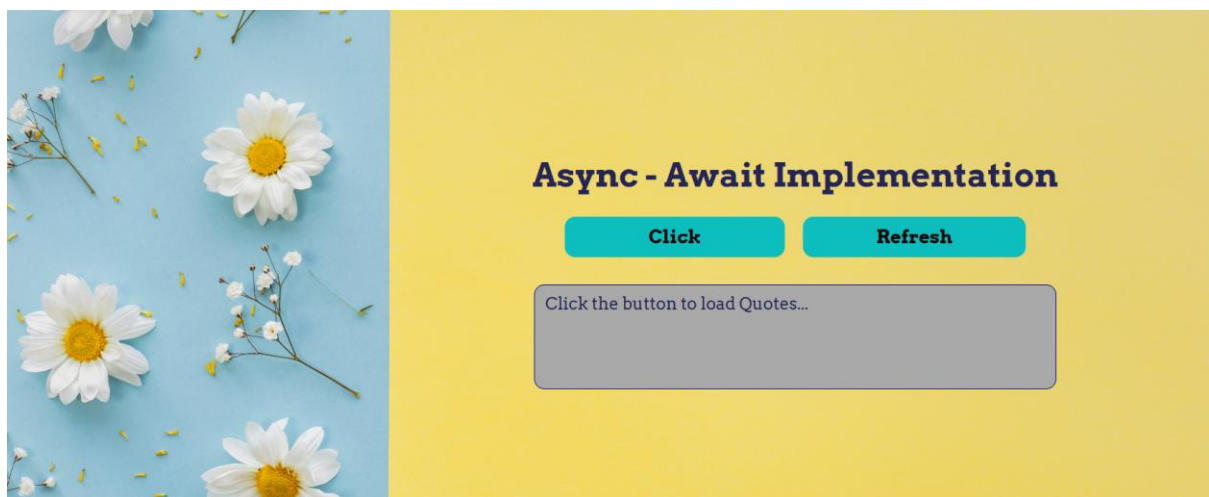

Task-2:Promises

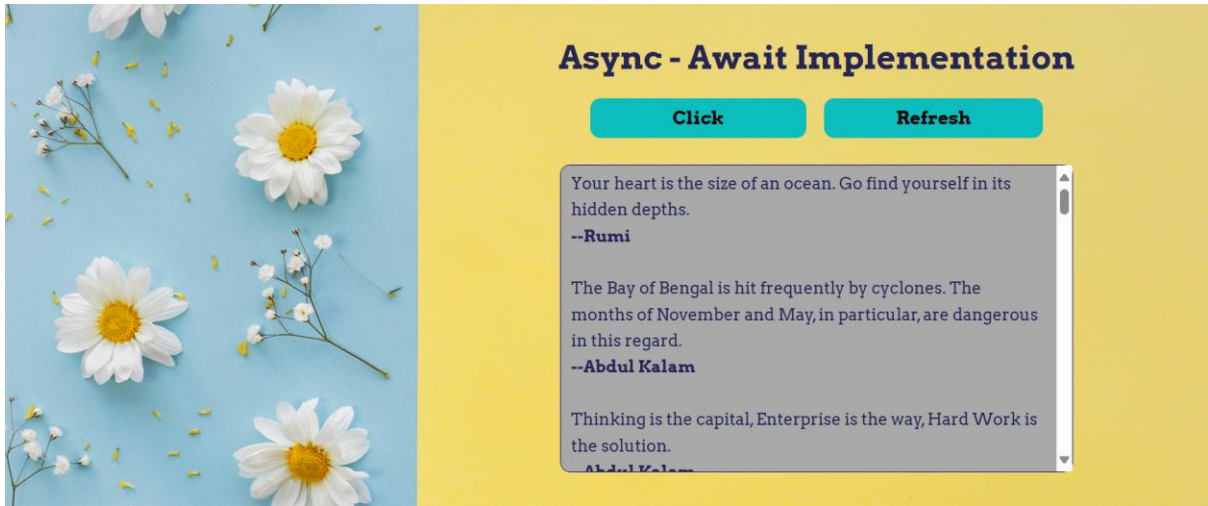

Click to see data

TASK 3: Async and Await task

When you click the button that will show the quotes data

You can refresh the page using button
